

INSTALLATION

For the installation, we recommend to screw the panels directly to the wall or ceiling. For a nicer appearance, use screws of the same colour as the base felt of the panel.

In case the base surface is wood, the panel may be attached with screws directly to the base surface. For a more convenient installation to stone walls, we recommend to use wooden rafters.

NB! To achieve a complete end-result, make sure to install the panels in the right direction to each other with an overlap.

Install with an overlap

MAINTENANCE

Panels can be cleaned with non-abrasive care products. Use a damp cloth to clean the ribs and remove excess water with a dry cloth.

Felt can be cleaned using a vacuum cleaner.
